To Advertisers.—The Vermont Daily Transcript has the largest circulation in St. Albans and in Franklin County, of any daily paper, and on that account, if no other, the best medium for advertising.

Local Items.

OUR DAILY.—Those wishing to secure copies of our daily paper can do so at Merrifield's and Baker's bookstores, as well as of carriers, and at the office. Copies of our weekly paper may also be had at these places.

Ex-Governor Royce is lying quite ill at his residence, in East Berkshire.

MASONIC FUNERAL.—Under our obituary head to-day appears the death of Charles H. Roberts, of Phillipsburgh, P. Q. His remains will be buried at Phillipsburgh, on Monday next, at one o'clock, with masonic honors. All are invited to attend.

SWANTON F. L. S.—The Ladies of Swan on Falls will give an Oyster Supper on Tuesday evening next, Oct. 27, at Jennison's Hotel, to which all are invited. Everything bids fair for a large and happy gathering.

KILLED IN WILLISTON.—Mr. Wm. K. Taft, a highly respected and influential citizen of Williston, was instantly killed on Thursday afternoon, under a house which he was moving, which suddenly slipped from the shores and fell upon him. The deceased was a brother of Hon. R. S. Taft, of Burlington, and for many years was the Master of North Star Lodge F & A M of Richmond. His funeral will take place at Williston on Sunday next, under the auspices of the Masonic Fraternity.

OIL OF CLOVES AS A BEVERAGE.—Among the importations made at this port, on Thursday, was a case purporting to contain six dozen bottles of pale ale, which was invoiced and entered as such. Somehow, three dozen bottles of the Oil of Cloves had been mixed with the ale in packing, which error, upon being discovered at the Custom House, resulted in the loss to the importer, of the whole lot. It is seldom that bottles containing ale, and oil of cloves, so closely resemble each other in color, size and packing.

Vermont Historical Society.

ANNUAL MEETING OF 1868.

MONTPELIER, Oct. 20.

The Society met at Montpelier at two o'clock p. m. Rev. P. H. White, President of the Society, in the chair.

The Society proceeded, as its first business, to the election of officers for the year ensuing, and the officers of the preceding year were unanimously re-elected, as follows:

President.—Rev. Pliny H. White, of Coventry.

Vice-Presidents.—Rev. W. H. Lord, of Montpelier; Hon. G. W. Benedict, of Burlington; General John W. Phillips, of Bakersfield.

Recording Secretary.—Geo. F. Houghton.

Corresponding Secretaries.—A. D. Hager, of Proctorville; Henry Clark, of Rutland.

Librarian.—Hon. Chas. Reed, Montpelier.

THE AMERICAN COOKING STOVE.—The only real base burner. It is a well known fact that in a cooking stove with an elongated fire-box the fire will die out at each end, and a large quantity of dead coal will accumulate at those points. To prevent this in the American and to aid and make a uniform combustion throughout all parts of the fire-box, air is admitted into a hollow chamber at the top of the stove above the fire, and carried through this hollow heated chamber down to near the bottom of the fire-box at each end, and then admitted directly into the burning mass of coal. This means a uniform combustion is obtained in all parts of the fire-chamber, and

re 81er—H. D. Hopkins, Montpelier.

REPORTER.—Hiland Hall Bennington, Wm. H. Parker, Middlebury; J. B. Paine, Rutland; M. H. Beckman, Burlington; L. L. Ditcher, St. Albans; P. D. Braden, Northfield; G. W. Grandy, Verden.

The report of the Treasurer was submitted, showing that the receipts of the year were \$61; and the total amount in the treasury something over \$80.

The Librarian presented his report. Dr. P. D. Braden offered the following resolution, which was adopted:

Resolved, That the Secretary of the Society be requested to collect of the several State Banks of this State, or of the Bank Note Engravers, so much of the bills to be preserved in the cabinet of the Soc. etc.

Resolved, That the Committee of Publication of the volume of collections of the Soc. have authority to draw on the Treasurer for any funds in his hands needed for the publication of the volume.

Hon. James Hutchinson, Jr., of Braintree, was elected a resident member of the Society, and Edmund P. Snider, of Boston, a corresponding member.

On motion of Hon. Danl. Baldwin, a committee of three, consisting of Rev. P. H. White, Dr. G. B. Bullard and Jonathan Ross, was appointed to examine into the claims of Capt. Samuel Morley, late of Fairlee, Vt., to be the original inventor of steam navigation, and report to the next annual meeting.

The Society then adjourned to meet at the Hall of Representatives in the evening, to listen to the biographical discourse on Hon. Jacob Collamer, by Hon. James Barrett of Woodstock.

SOME PEGS.—The largest manufactory of shoe pegs in the country is said to be in this city, where one factory is accustomed to transform, every day, four cords of wood into 400 bushels of shoe pegs.—*Burlington Free Press*, Oct. 22d.

PERSONAL.—Almon Clark formerly of Highgate, and Surgeon of the 10th Vt. and 1st Vt. Cavalry is stopping in Wisconsin for Grant and Colfax. The *Shelton County Herald* of the 20th inst., contains accounts of four meetings recently addressed by him "with capital effect."

THE ELECTORAL COLLEGE, 1868.—The following table shows the vote of each State in the Electoral College of 1868, Virginia, Mississippi, and Texas being as yet unconstructed States, have no votes this year:
